

Core Graphic 5

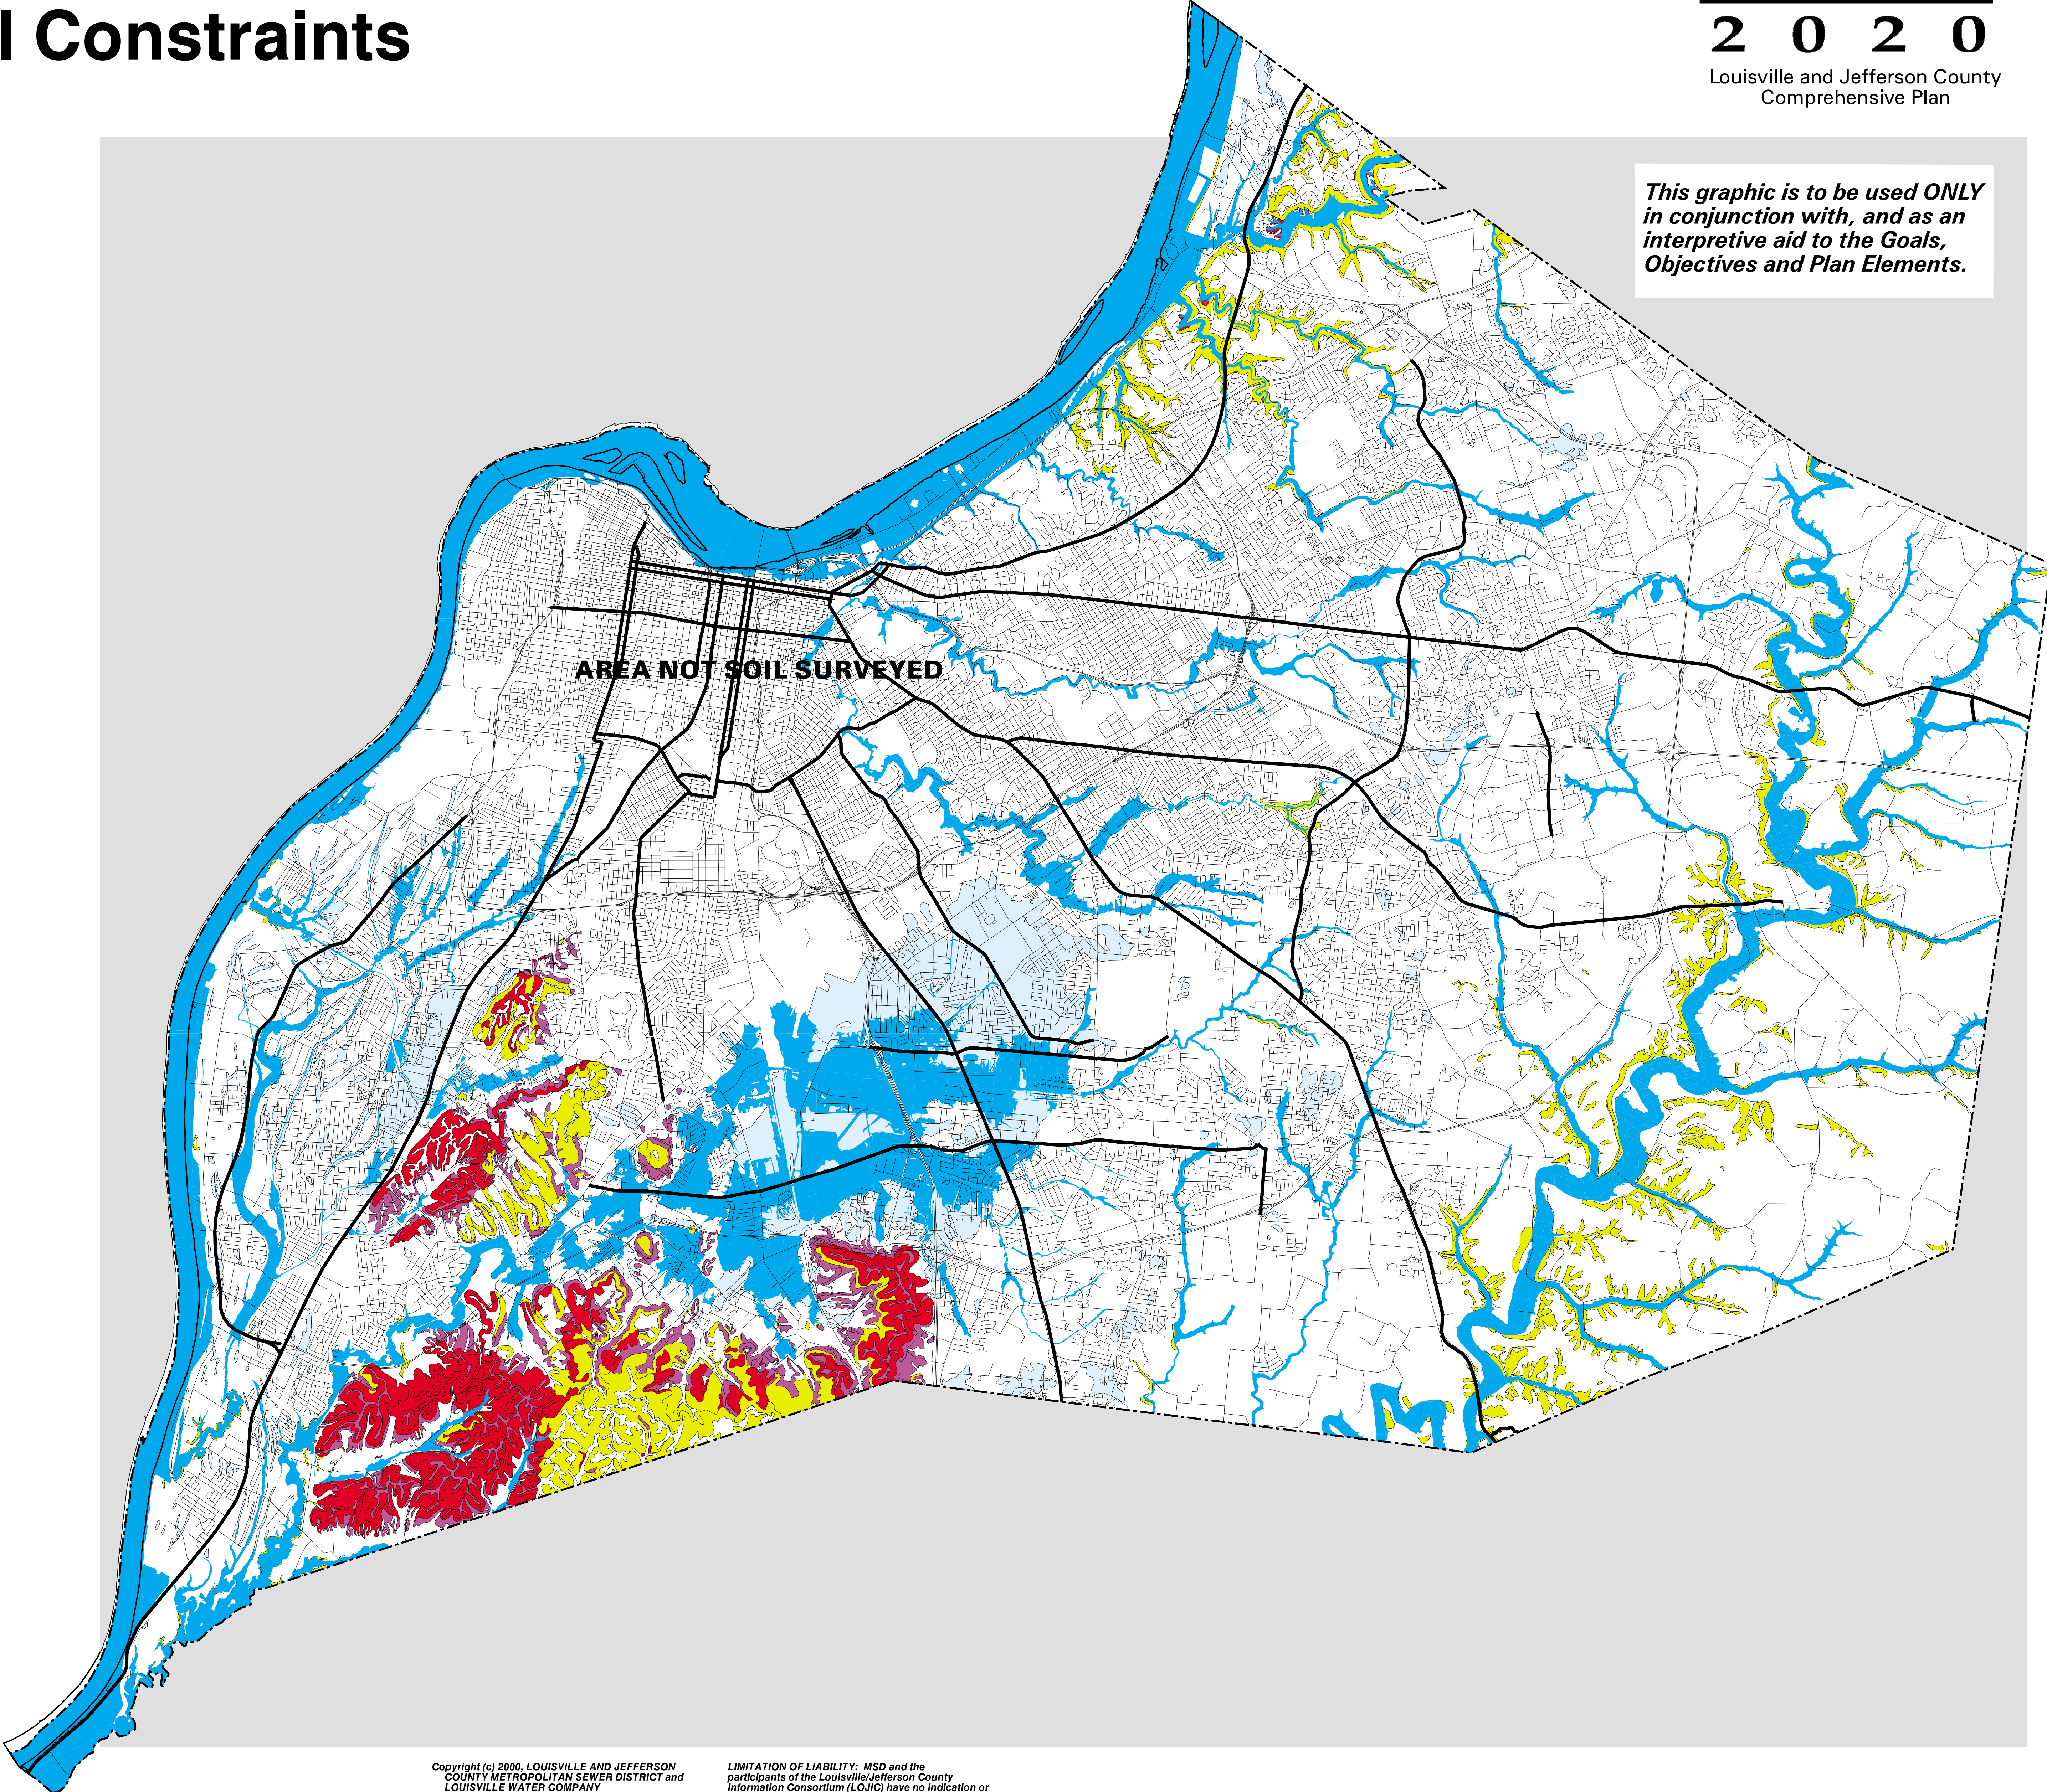

Environmental Constraints

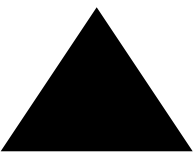

This graphic is to be used ONLY in conjunction with, and as an interpretive aid to the Goals, Objectives and Plan Elements.

-  Regulatory Floodplain
-  Hydric Soils
-  Steep Slopes (20% and above)
-  Unstable Soils
(Soils generally characterized by clay over shale)
-  Unstable Soils on Steep Slopes

The flood limits shown on this map are representations of digital map data created at a scale of 1"=400' by the Federal Emergency Management Agency (FEMA) in the Flood Insurance Rate Map (FIRM) for Jefferson County, Kentucky and incorporated areas. The Floodplain Management ordinance regulates development within flood prone areas. It is based on calculation of floodplain assuming a fully developed watershed rather than on the FEMA floodplain.

The soil and slope characteristics shown on this map are representations of digital map data created at a scale of 1"=1320' by the Natural Resource Conservation Service and LOJIC, and are based on the Soil Survey, Jefferson County, Kentucky, US Department of Agriculture, 1966 and 1991.

1 Mile
1" = 1 Mile
